

**MEMORY CARE
HOME SOLUTIONS®**

12-month Caregiver Intervention

Your path to more confident caregiving.

1 *Initial Family Consultation. Meet with one of our dementia experts to discuss your concerns and identify your priorities related to caregiving. Common discussion topics include dementia education, behavior management, activities at home, home safety, and community resources.

2 Occupational Therapy Visits & Home Safety Assessment. Receive in-home visits with an occupational therapist who will conduct a home safety assessment and provide hands-on training to help you improve your caregiving skills. These services are typically covered by healthcare insurance.

3 *Phone Consultations. Our professionals are available to answer questions and offer advice and referrals. The program includes two formal follow-up phone consultations at 3 and 6 months after your initial family consultation.

4 *12-Month Mail Survey. You will receive a final assessment and survey at the completion of the program.

*Indicates FREE services thanks to grant funding and private or corporate donations
